

To all valued customers,

Universal White Cement is involved in helping the U.S. Consumer Safety Commission in their efforts to recall all main drain covers that may have been improperly tested and may have inaccurate flow ratings. All main drains manufactured by Edge plastics and Color Match that were sold after December 19<sup>th</sup> 2008 are affected. This recall does not require any drains in pools that are on split lines meeting new construction standards to be replaced. This recall does however affect drains in kiddie pools, spas, and pools lacking split lines meeting current new construction standards.

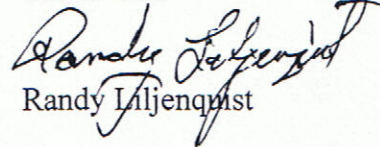

We are currently working with the Edge Plastics and Color Match who are in the process of developing and testing replacement drains that will screw back into the existing rings. We have been told that these new drains should be ready in 6-8 weeks. In the meantime we are asking for all customer information on pools and spas that will require these retro fit drains. If we have this information ahead of time we can better anticipate the number of drains that will need to be replaced.

The following information will be needed:

1. Homeowners name
2. Address
3. Date of installation
4. Number of drains to be replaced

Thank you for your help in keeping a high safety standard in all your work. Together we can help insure the safety and well being of all current and future clientele. If you or your customers have any questions or concerns please contact us at 623-915-1813.

Thank You

  
Randy Liljenquist
